

AVIN JOY

B.Tech. - Computer Science & Engineering - Artificial Intelligence

Ayur, Kerala, India - 691533 | +91-7306567797 | avinjoythankachan@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence with practical experience in machine learning, computer vision, and full-stack application development across academic and industry settings. Seeking a role to apply technical skills, collaborate with skilled professionals, and grow in an environment that values innovation and impact.

KEY EXPERTISE

Machine Learning, Deep Learning, Artificial Intelligence, Computer Vision, Natural Language Processing (NLP), PyTorch, Python, FastAPI, React Native, Full Stack Development, MySQL, SQLite, Flutter, Dart, Automation, n8n, Git/GitHub

EDUCATION

Mar Baselios College of Engineering and Technology (Autonomous) 2023 - 2027

B.Tech. - Computer Science & Engineering - Artificial Intelligence | CGPA: 8.67 / 10

Sharjah Indian School 2023

Class 12 | CBSE | Percentage: 79.20 / 100

Sharjah Indian School 2021

Class 10 | CBSE | Percentage: 87 / 100

PROJECTS

Single-Node Finetuning of Tiny LLaMA using Intel Xeon SPR Jul 2024 - Jun 2026

Mentor: Dr. Tessy Mathew | Team Size: 2

- Fine-tuned TinyLLaMA-1.1B-Chat using PyTorch and Intel's extension for transformers, optimized to run efficiently on Intel Xeon Scalable Processors instead of GPU hardware, as part of Intel's Unnati Industrial Training Program 2024.
- Trained on the Stanford Alpaca dataset through supervised fine-tuning, covering the full pipeline from environment setup to deploying a working generative AI chatbot, documented in a reproducible Jupyter Notebook.

E-Style - The AI Stylist Jan 2026 - Apr 2026

Mentor: Ms. Vijitha Robinson | Team Size: 4

- Built an AI-powered personal styling platform combining machine learning and computer vision, running a locally hosted AI model for fashion insights and styling recommendations.
- Implemented clothing extraction from photos, color analysis, and outfit suggestions based on visual similarity and user preferences, plus a virtual try-on rendering system within a mobile app.

Deep Convolutional GAN (DCGAN) for Realistic Human Face Synthesis Mar 2026

Mentor: Dr. Neena Raj N R | Team Size: 4

- Built a Deep Convolutional GAN using Python and PyTorch to generate realistic human faces via adversarial training between Generator and Discriminator networks using transposed convolutions and batch normalization.
- Trained on large-scale face datasets with GPU acceleration, progressively improving output quality across training epochs.

Book-Nest - Library Management System Dec 2024

Team Size: 4

- Developed a Python and SQLite-based library management system with Tkinter, supporting full CRUD operations for books and members, issuing/returns with due-date tracking, and Pandas-powered transaction reporting.

Vigil Eye - Drowsiness Detection System Nov 2024

Team Size: 2

- Built a real-time drowsiness detection system using Python, OpenCV, and dlib, analyzing facial landmarks to track Eye Aspect Ratio and trigger audio alerts via pygame upon detecting prolonged eye closure.

CafeOrd: Canteen Management System

Oct 2024 - Nov 2024

Team Size: 4

- Built a Java and MySQL-based desktop application using Java Swing to streamline canteen operations, featuring secure login, real-time order management, and persistent data storage via MySQL Connector for Java in an MVC structure.

INTERNSHIPS & EXPERIENCE

Data Science Intern - Nytt Analytics Pvt Ltd

Nov 2025 - Present

IT Product & Services | Skills: Automation, Process Automation, JSON, SEO, Python

- Developed and managed automation workflows using n8n to collect, process, and analyze data from Google Analytics and Google Search Console.
- Built automated pipelines for reporting, performance tracking, and insight generation, enabling data-driven decision making across SEO and digital marketing initiatives.
- Integrated APIs, transformed data, and created scalable automation solutions to improve operational efficiency and business intelligence.

Data Science and AI Intern - Keltron Knowledge Centre

Jun 2025

IT Product & Services

- Completed a one-week internship covering foundational and applied topics in Python and artificial intelligence, including data types, control statements, and collection types.
- Gained structured introduction to core AI/ML concepts such as classification and regression, bridging programming fundamentals with real-world AI techniques.

Python Developer - Infotact Solutions

Dec 2024 - Feb 2025

IT Product & Services

- Gained hands-on experience designing and developing software solutions using Python across real-world projects involving programming, data processing, and application development.
- Contributed to writing efficient, maintainable code, debugging and testing applications, while collaborating with mentors and team members.

Android Application Developer - ICT Academy of Kerala

Dec 2024 - Jan 2025

IT Product & Services

- Contributed to development of cross-platform mobile applications using Flutter and Dart, building responsive user interfaces and integrating backend services through APIs.
- Participated in testing, debugging, and performance optimization while collaborating with the development team.

ACHIEVEMENTS

- One among the Top 3 in ML Fundamentals Hands-on Project by ELDII, 2025
- Qualified Prelims - Smart India Hackathon, 2024
- Qualified Prelims - Smart India Hackathon, 2025

ASSESSMENTS / CERTIFICATIONS

Deep Learning - IIT Ropar

Provider: NPTEL (IIT Madras / SWAYAM) | Aggregate: 76/100

- Completed the 12-week NPTEL Elite Online Certification course on Deep Learning offered by IIT Ropar, covering neural network architectures, optimization techniques, and applications in computer vision and pattern recognition. Scored 76% among 4,623 certified candidates nationwide.

Artificial Intelligence: Concepts and Techniques

Provider: NPTEL (IISc Bangalore / SWAYAM) | Aggregate: 83/100

- Completed the 12-week NPTEL Elite Online Certification course covering core AI concepts including search, reasoning, and intelligent system design. Scored 83% among 6,785 certified candidates nationwide.

Python Fundamentals

Provider: Infosys Springboard

- Completed core concepts and foundations of Python programming (March 2024).

Mobile App Development using Flutter

Provider: Infosys Springboard

- Completed fundamentals of building cross-platform mobile applications using Flutter (November 2025).

POSITIONS OF RESPONSIBILITY

Regional Coordinator, NRPF (NSS Flagship Event) - Trivandrum Region

- Served as the operational link between the State Coordinator and student unit secretaries across engineering and technical campuses, onboarding NSS volunteers and organizing regional events.
- Audited campus-level data on plastic collection, sapling survival rates, and fundraising outcomes; oversaw environmental initiatives including Thanal (afforestation) and TreeTag (digital sapling tracking).

Student Coordinator - Prompt Competition, NEXORA 2026

- Planned and managed end-to-end execution of the event under the Indian Society for Technical Education at MBCET, handling registrations, briefings, and on-ground logistics for a two-day convention.

SEMINARS / TRAININGS / WORKSHOPS

IBM SkillsBuild Project Based Learning Program (Agentic AI) - CSRBOX Jul 2025 - Aug 2025

- Completed a four-week intensive training on designing and developing AI agents, covering agentic AI fundamentals through hands-on architecture and deployment of autonomous agents.

Python Development - Infotact Solutions Dec 2024 - Feb 2025

- Completed a two-month training program covering practical Python development concepts with hands-on project work.

3 Days Python Bootcamp - ELDII Feb 2024

- Attended an intensive boot-camp providing hands-on exposure to Python programming fundamentals.

EXTRA CURRICULAR ACTIVITIES

- NSS Volunteer - Event Management and Technical Event Coordination

PERSONAL DETAILS

Date of Birth: 23 Oct 2005 | Gender: Male | Marital Status: Single | Languages: Malayalam, English, Hindi
